CAB JOURNALS

ANNUAL SUBSCRIPTION RATES 1976

The abstract journals form one part of the range of services in agricultural science provided by CAB, and contain yearly a total of some 125,000 abstracts and citations by title. They constitute the only comprehensive coverage in English of the world literature on agriculture and related sciences.

The journals are produced by computer techniques, and a consolidated data base is created from which new services are being developed. All or part of the data base, already containing over ¼ million items, is available on magnetic tape. Enquiries concerning the journals, including suggestions about subject coverage, use of the computerized system, tapes, or new services, are welcomed.
